Review "One of the reasons why we adopted the Mankiw text was because of its relevant concepts that students could really relate to. I would say to continue with this trend, and also be sure to use

examples that relate to the current economic conditions that make sense to a beginner economics student." "I have used Mankiw for several years, across at least 3 or 4 of its editions. I like the writing in the book--it's clear and exposit the ideas effectively. It covers topics that I want to cover, mostly in the order that I like to cover them. It's at the appropriate level for our students--not too difficult but not superficial either. I also like the fact that this book is very closely integrated with the Aplia system, which I believe is an important learning tool." "Very student friendly text. Makes economics easy to understand. Some of the other texts would take a lot of reading to explain an idea." About the Author N. Gregory Mankiw is Robert M. Beren Professor of Economics at Harvard University. The way it is structured is very linear. The info is clearly stated with lots of simple examples. Lastly, the authors humor comes through and makes the book more fun to read. I am teaching myself for a CLEP exam and I am about a third through the book. I haven't used other macroeconomics textbooks but in regards to other textbooks of any subject this is easily one of the best. Highly recommended. 0 of 0 people found the following review helpful.
