Book 1 of the Dark Planet Warriors Series Abbey Some scary looking aliens have just boarded Fortuna Tau, our little asteroid mining station. Kordolians, by the looks of things. What the hell do they want with this floating rust bucket? What are they even doing here? Come to think of it, I've never seen a Kordolian up close before. They're huge and intimidating, with strange silver skin and pointed ears. They have freaky nano-armor, and they're packing a serious arsenal. We Humans stand no chance against them. When I encounter their General, I find him insufferable. Arrogant. Domineering. He won't tell me anything. I guess that's what happens when your race is kicking ass across the Nine Galaxies. You get pigheaded. So why do I keep running into him? Why does he keep looking at me like that? And what's with this weird feeling I get when he's around? I really hope these guys fix their ship and go away soon, because I get the feeling they could be major trouble. Tarak Sucked into a wormhole during a fierce skirmish with an enemy ship. Spat out near a Human mining station in a remote corner of the Nine Galaxies. Stuck with weak Humans who operate with inferior metals and technology. This mission couldn't get any worse. We need to fix our craft, kill the cursed Xargek, and get out of here before the wormhole collapses. I don't really care about these Humans. Their existence makes no sense to me. So why has this strange Human female captured my attention? She's messy, awkward, and she babbles nonsense half the time. These Humans are crazy. I don't understand them at all, especially this female. Why do I keep coming back to her? I need to leave this place before I go insane. Warning: This book contains swearing, violence and steamy sex scenes. It's recommended for readers aged 18 and over.

By mamabeargreerlovesaz The H in this book is the hot Alpha Male, Tarak. He is unbelievably sexy, loving, and strong. As the best General in his planet's military he is of course a very dominant Alpha, but I love how he uses his "devil may care" attitude to all else when showing affection towards his mate. I love how his character is written showing how he can be both a strong leader to others but treats his mate as an equal, loving and caring about her feelings and opinions. He doesn't just dismiss her as being a lowly female or human. Abby's love has made him accept that changes have to be made for his race to survive, and by the end of this book they are joined by the exiled Prince of Tarak's planet to negotiate a peaceful joining with Earth. I'm excited to read book four! I would also recommend this for those who love the "Ice Planet Barbarians" series from Ruby Dixon, these are similar without being exactly the same. 2 of 2 people found the following review helpful. I'm so excited By Carla Hoffmann If only I could put up a photo here, I would be able to properly convey the extent of my enthusiasm through my (probably manic-looking) expression. Hm, maybe it's a good thing I can't. It may scar some people. But if the same people reading this are kindred spirits, they might have the same reaction. READ THIS. I approve. 0 of 0 people found the following review helpful. Dark planet Warriort By Kindle Customer Very good book, seems to be first of a series. Lots of action and Romance. I enjoyed this book.
