About the Author Elaine Marieb After receiving her Ph.D. in zoology from the University of Massachusetts at Amherst, Elaine N. Marieb joined the faculty of the Biological Science Division of Holyoke Community College. While teaching at Holyoke Community College, where many of her students were pursuing nursing degrees, she developed a desire to better understand the relationship between the scientific study of the human body and the clinical aspects of the nursing practice. To that end, while continuing to teach full time, Dr. Marieb pursued her nursing education, which culminated in a Master of Science degree with a clinical specialization in gerontology from the University of Massachusetts. It is this experience that has informed the development of the unique perspective and accessibility for which her publications are known. Dr. Marieb has given generously to provide opportunities for students to further their education. She funds the E. N.

Marieb Science Research Awards at Mount Holyoke College, which promotes research by undergraduate science majors, and has underwritten renovation of the biology labs in Clapp Laboratory at that college. Dr. Marieb also contributes to the University of Massachusetts at Amherst, where she generously provided funding for reconstruction and instrumentation of a cutting-edge cytology research laboratory. Recognizing the severe national shortage of nursing faculty, she underwrites the Nursing Scholars of the Future Grant Program at the university. In January 2012, Florida Gulf Coast University named a new health professions facility in her honor. The Dr. Elaine Nicpon Marieb Hall houses several specialized laboratories for the School of Nursing, made possible by Dr. Marieb's generous support. Suzanne Keller Suzanne M. Keller began her teaching career while she was still in graduate school at the University of Texas Health Science Center in San Antonio, Texas. Inspired by her lifelong passion for learning, Dr. Keller quickly adopted a teaching style focused on translating challenging concepts into easily understood parts using analogies and stories from her own experiences. An Iowa native, Dr. Keller uses her expertise to teach microbiology and anatomy and physiology at Indian Hills Community College, where most of her students are studying nursing or other health science programs. Dr. Keller values education as a way for students to express their values through the careers they pursue. She supports those endeavors both in and out of the classroom by participating in her local Lions Club, by donating money to the Indian Hills Foundation to fund scholarships, and by financially supporting service-learning trips for students. Dr. Keller also sponsors children in need with gifts for the holidays. Dr. Keller is a member of the Human Anatomy and Physiology Society (HAPS) and the Iowa Academy of Science. When not teaching or writing, Dr. Keller enjoys reading, traveling, family gatherings, and relaxing at home under the watchful eyes of her two canine children.

Customer Reviews Most helpful customer reviews 1 of 1 people found the following review helpful. Great book! Goes into so much detail about the ... By Kayla Jobbins Great book! Goes into so much detail about the different anatomy and Physiology of your body! The pictures are great and all are all very detailed which helps out a lot for tests that may be taken in the class room. This book also has chapter tests and review materials at the end of each chapter which is a great summary for what could potentially be on the test. Overall, one of the best anatomy books you could purchase with up to date information. 5 of 5 people found the following review helpful. no access code By Olenka The copy of the book was in pretty good shape, but there is no access code like promised! :(0 of 0 people found the following review helpful. The online AP is not helpful. For flashcards, ... By Xueqin Lu The online AP is not helpful. For flashcards, simple word "cell" appear more than twice with pronunciation. But other words such as antecubital, occipital no pronunciation. Deoxyribose (DNA) pronounce only "DNA". The program shows that people don't pay attention with vocabulary. It is careless with flashcards. So I would give it two or three stars. only muscular and skeletal system chapters have anatomy videos. See all 58 customer reviews...
