About the Author Sarah Grison is an Associate Professor of Psychology at Parkland College. She brings 20 years of psychology teaching experience to Psychology in Your Life. Sarah's research examines how psychological research can be applied to teaching and learning. She teaches introductory psychology regularly and puts her laboratory and classroom research into practice to improve student learning and actively engage students in large lectures. She has created and taught courses to support novice teachers in developing their skills. Sarah is a certified Teacher-Scholar who previously was recognized each year on the University of Illinois List of Excellent Teachers. She has won the University of Illinois Provost's Initiative for Teaching Advancement Award and the Association for Psychological Science Award for Teaching and Public Understanding of Psychological Science. She is a member of the Association for Psychological Science; the American Educational Research Association; the International Mind, Brain, and Education Society; and the American Psychological Association (Division 2, Society for Teaching of Psychology). Todd F. Heatherton is the

Lincoln Filene Professor in Human Relations in the Department of Psychological and Brain Sciences at Dartmouth College. He teaches introductory psychology every year. His recent research takes a social brain sciences approach, which combines theories and methods of evolutionary psychology, social cognition, and cognitive neuroscience to examine the neural underpinnings of social behavior. Michael S. Gazzaniga is Distinguished Professor and Director of the Sage Center for the Study of the Mind at the University of California, Santa Barbara. In his career, he has introduced thousands of students to psychology and cognitive neuroscience.

This book has awesome up to date information on psychology and it is a very easy read. Although I was required to get it for one of my classes, I typically would try to re sell my books after, but not this one, I will be keeping it. 0 of 0 people found the following review helpful. Good Book By ARH This book is super easy to understand but doesn't make it feel like you're missing out on details. It was great for my psychology 101 course and I am kind of sad I rented it because it would be great to keep. The online resources that it came with were awesome when preparing for tests as well. 0 of 0 people found the following review helpful. Never used it! By E. Thompson I did not even need this book, as we did everything in class. It seems like it would have be useful if I needed it. I don't know how to rate it, since I didn't use it. So I will rate it on shipping speed and price. See all 77 customer reviews...
